

PROFILE

Analytical and detail-oriented professional pursuing a Master of Computer Applications (MCA) with a strong academic foundation in scientific research and data analysis (B.Sc. in Biological Science). Skilled in software development, algorithm design, data handling, and interdisciplinary problem-solving. Adept at transforming complex biological or business-driven datasets into actionable insights and scalable software solutions. Passionate about leveraging technology, scientific thinking, and modern tools to drive innovation and system improvements.

SKILLS

- Software Development Lifecycle (SDLC)
- Data Collection, Cleaning, Wrangling & Analysis
- Algorithm Design, Scientific Programming & Analytical Modeling
- Operating Systems (Linux & Windows) & Computer Networks
- AI Concepts, Digital Currency & Drone Technology Awareness
- Biological Data Interpretation, Ecological Understanding & Research Methodologies (leveraging B.Sc. Biological Science)
- Technical Documentation, Report Writing & Research Presentation
- Problem Solving, Logical Reasoning & Interdisciplinary Thinking (Biology + Technology)
